Pricing Model

Labnaf Licenses are Perpetual

New License

A new license entitles the purchaser to:

- A license certificate that enables the correct functionality set for the license type.
- A 12 month 'subscription' that entitles the user to:
 - priority email support and
 - acquire free updates of the Labnaf software for the purchased license type.

Yearly License Renewal

Once you have purchased Labnaf software, you can reinstate it, before your subscription lapses, just by paying the renewal fee for the license type you hold.

A renewal extends a purchaser's 'subscription' for an additional 12 months, thereby providing access to priority email support and free updates.

A renewal entitles the purchaser to receive the latest version of the Labnaf software.

The renewal will cover the number and type of licenses originally purchased.

These Labnaf software license certificates will not expire. Only the subscription will do.

If you choose not to renew, you can continue to use the Labnaf software that you purchased, you just won't be able to update it unless you renew.

Academic Program

The Labnaf Academic Program offers lecturers, teachers, pupils, students or trainers a 50% academic discount.

Academic Licenses provide the same functionality as commercial products.

This program may be used exclusively for non-commercial purposes and is only available for lecturers, teachers, pupils, students or trainers.

Prior to purchase, Labnaf requires a proof of your academic status, such as a scanned copy of your student/staff ID.

In the case where a photo ID is not available, a copy of your current student enrollment records is required.

If you are a lecturer or teacher, a reference to your institution's website listing you and your role suffices as alternative documentation.

Please send your proof of academic status to sales@labnaf.one.

The prices provided in this document do not include:

- VAT
- Sparx Systems' EA licenses (Labnaf needs EA's modeling infrastructure components)

(*) Free software and documentation on www.labnaf.one

On-line educational material is accessible for free only for the single purpose of self-education.

Any commercial usage of this material is subject to specific license fees.

(**) As the name suggests, Floating Licenses 'float' from user to user as they start and stop the various software products.

A license for the product is only required while a user has the software running.

Once the product is shut down the license is available for another user to make use of.

 $Labnaf \ floating \ license \ work \ hand \ in \ hand \ are \ sold \ only \ with \ Sparx \ Systems' \ Enterprise \ Architect \ floating \ licenses.$

**** 20 Labnaf PowerShell users

20 users of one shared model repository

or, if there is no shared model repository, 20 users of any resulting output material generated by the Labnaf PowerShell.

Word, PDF and HTML generation require AddIn Team or Addin Corporate running on the application server.

Using the free Labnaf Addin Lite Edition, you can create up to 150 Labnaf elements.
